Product Description

Cuticle Pusher by Ultra Implements is made in Germany of high quality Stainless Steel. It features a rounded end and a square end for maximum efficiency. The specially designed tips are thin, but not sharp, so you can push back your cuticles easily without scratching your nail bed. This is an absolute must-have tool for your home manicure! For Professional Results: Soak fingertips in warm water to soften cuticles. Gently push back cuticles with the cuticle pusher. Specially tapered edges will not scratch the nail plate. Use caution and do not push back live skin.
