Product Description

Toenail Nipper 4 3/4 Inch Barrel Spring by Ultra Implements is made in Italy of high quality Stainless Steel to stay sharp and rust-free. If your toenails are too thick for a clipper, and scissors don't give you the power you need, these nippers are a great alternative! The nippers also feature a locking mechanism to keep the jaws closed and secured for storage. For Professional Results: Soak feet in warm water to soften nails or use after a shower or a bath. Carefully trim the toenails to desired length. The barrel spring provides maximum cutting power with minimal effort. Do not cut into the nail bed or surrounding live skin.
