Product Description

Toenail Nipper 5 1/2 Inch Barrel Spring by Ultra Implements is made in Italy of high quality Stainless Steel to stay sharp and rust-free. They feature sharp cutting edges, strong construction and longer handles to improve your reach. A handy, locking mechanism keeps the jaws safely closed and secured for storage. If you like the cutting power of a nipper but could use a little extra length to reach your toes comfortably, you'll love this style!

For Professional Results: Soak feet in warm water to soften nails or use after a shower or a bath. The barrel spring provides maximum cutting power with minimal effort; extra long handles make it easier for people with limited flexibility to reach their toes. Do not cut into the nail bed or surrounding live skin.
