Product Description

Toenail Clipper Straight Cut by Ultra Implements is made in Japan of high quality Stainless Steel to keep the cutting edges sharp and rust-free. The ergonomic design features an angled head so you can keep your wrist in a neutral position while clipping. The sliding, plastic, clipping-catcher and over sized handle give you a comfortable, non-slip grip. If it's difficult for you to bend or twist your wrist, this is the clipper you've been waiting for! For Professional Results: Trim nails to desired length and shape. Clippings will be trapped in the catcher for no mess grooming. Angled cutting blades for increased comfort.
