Product Description

Toenail Clipper Straight Cut by Ultra Implements is a reliable, inexpensive way to help prevent ingrown toenails. Podiatrists recommend cutting toenails straight across, and the specialized blades on this clipper help you to do just that!

For Professional Results: Pull up clipper handle and rotate 180 degrees. Position open mouth of clipper over nail to be cut. Trim to desired length and shape. Do not cut into the corners of the nail; clipper has been specifically designed to prevent ingrown toenails. Do not cut into live skin.
