Product Description

Toenail Clipper Wide Jaw by Ultra Implements is made of high quality Stainless Steel and is ideal for thicker toenails. The increased jaw opening accommodates the toenail and allows for easier positioning. The sharp, stainless steel blades then cut through it quickly and cleanly. The clipper features a traditional, easy to use, curved blade. For Professional Results: Pull up clipper handle and rotate 180 degrees. Position open mouth of clipper over the nail to be cut. Trim to desired length and shape. Extra wide jaw opening is ideal for thick toenails.
