Product Description

Toenail Tool Ingrown by Ultra Implements is made in Germany of high quality Stainless Steel. This double sided tool is ideal for treating ingrown toenails. The excavator tip cleans and removes debris from under the affect toenail. The file side removes the sharp, painful edges of the ingrown, preventing occurrence.

For Professional Results: Stabilize the affected toenail with your thumb. Gently lift the nail edge with the file side of the tool and pull toward the free edge. Use the excavator side to clean debris and filings from under the nail.
