Product Description

Lava Stone by Ultra Implements is made of natural volcanic rock to gently and effectively smooth calluses and rough skin. The gas bubbles trapped in the rock while it forms create smoothing pockets of variable size to reduce thickened skin and polish it to a soft finish. Best when used wet.

For Professional Results: Soak feet in warm, soapy water to clean and soften. Gently rub the lava stone over callused or rough skin until smooth. Dry feet and then apply with one of our Qtica Smart Spa Lotions. Scrub lava stone gently with a nail brush to remove debris and continue to sanitize as usual.
