Product Description

Nickel File Coarse Grit by Ultra Implements is made in Korea and helps smooth thick, tough calluses. The specially designed nickel surface gently removes unwanted calluses without damaging the sensitive skin underneath. Use this file on dry feet and watch as callused skin is removed and healthy, glowing skin is revealed in minutes!

For Professional Results: Ideal for thick calluses. Can be used both wet and dry to remove heavy callusing and rough, dry skin. Calluses protect your feet from damage and should not be completely removed. Do not use the nickel file if you are diabetic or suffer from poor circulation.
