Product Description

Refectocil Pure Black Tint (no. 1) tints each hair pure black to make lashes look clearly longer and more voluminous. With this colour you can enhance brown or black eyelashes and eyebrows or tint light or white eyelashes and eyebrows in long-lasting pure black. Clients with dyed black hair can match their eyebrows with their hair colour using Refectocil No. 1 Pure Black. Great as a classic color among eyelash tints!

With Refectocil Eyelash and Eyebrow tints, you will always achieve a beautiful, long-lasting and intensive tinting result. Tinted eyelashes appear clearly longer and more voluminous, as the tinting accentuates the full length of the eyelashes faded by sun, water and everyday living. It adds gloss and shine to dull hair and freshens already faded or graying eyelashes. Your eyes appear livelier and more expressive - even without make up. The tint is absolutely water and smudge-proof, lasting up to 6 weeks.

The best result is achieved when applying the tint regularly, because with each tinting the colour will penetrate deeply into the eyelashes leaving them more intensely and durably coloured.

Content: 15ml Tube. Sufficient for approximately 30 applications.
