Product Description

Refectocil Natural Brown Tint (no. 3) is a very dark, well covering brown tone suitable for dark eyelashes and eyebrows. The naturally looking colour lends eyelashes and eyebrows intensive colour depth. It is suitable for clients with natural brown hair who prefer a particularly natural appearance. The eyelashes will look clearly longer and more voluminous. You can enhance brown or black eyelashes and eyebrows or tint light or white eyelashes and eyebrows with long-lasting dark brown. Great for a natural look!

With Refectocil Eyelash and Eyebrow tints, you will always achieve a beautiful, long-lasting and intensive tinting result. Tinted eyelashes appear clearly longer and more voluminous, as the tinting accentuates the full length of the eyelashes faded by sun, water and everyday living. It adds gloss and shine to dull hair and freshens already faded or graying eyelashes. Your eyes appear livelier and more expressive - even without make up. The tint is absolutely water and smudge-proof, lasting up to 6 weeks.

The best result is achieved when applying the tint regularly, because with each tinting the colour will penetrate deeply into the eyelashes leaving them more intensely and durably coloured.

Content: 15ml Tube. Sufficient for approximately 30 applications.
