Product Description

Refectocil Chestnut Tint (No. 4) will provide you with a wonderful result in a red-brown tone of chestnut. The tinting result will be more intensive the lighter the natural hair colour is. When used on light blonde to light brown hair, the result will be very intense. From medium brown hair on the result will be more discreet and a beautiful, soft chestnut lustre will appear. Great for a harmonious look!

With Refectocil Eyelash and Eyebrow tints, you will always achieve a beautiful, long-lasting and intensive tinting result. Tinted eyelashes appear clearly longer and more voluminous, as the tinting accentuates the full length of the eyelashes faded by sun, water and everyday living. It adds gloss and shine to dull hair and freshens already faded or graying eyelashes. Your eyes appear livelier and more expressive - even without make up. The tint is absolutely water and smudge-proof, lasting up to 6 weeks.

The best result is achieved when applying the tint regularly, because with each tinting the colour will penetrate deeply into the eyelashes leaving them more intensely and durably coloured.

Content: 15ml Tube. Sufficient for approximately 30 applications.
