Product Description

Refectocil Graphite Tint (no. 1.1) is suitable particularly for eyebrows turned grey. This shade discreetly covers grey or white hair evenly and gives it a light grey to dark grey tone - depending on the application time. Great for a shining look in the eyes of any age!

With Refectocil Eyelash and Eyebrow tints, you will always achieve a beautiful, long-lasting and intensive tinting result. Tinted eyelashes appear clearly longer and more voluminous, as the tinting accentuates the full length of the eyelashes faded by sun, water and everyday living. It adds gloss and shine to dull hair and freshens already faded or graying eyelashes. Your eyes appear livelier and more expressive - even without make up. The tint is absolutely water and smudge-proof, lasting up to 6 weeks.

The best result is achieved when applying the tint regularly, because with each tinting the colour will penetrate deeply into the eyelashes leaving them more intensely and durably coloured.

Content: 15ml Tube. Sufficient for approximately 30 applications.
