Product Description

Refectocil Light Brown Tint (no. 3.1) is suitable to discreetly emphasize light blonde to light brown eyelashes and eyebrows, if Refectocil No. 3 Natural Brown is felt to be too dark. This colour tone is mainly preferred by blonde clients who like a discreet and naturally looking enhancement of their eyebrows. Great for subtle enhancements!

With Refectocil Eyelash and Eyebrow tints, you will always achieve a beautiful, long-lasting and intensive tinting result. Tinted eyelashes appear clearly longer and more voluminous, as the tinting accentuates the full length of the eyelashes faded by sun, water and everyday living. It adds gloss and shine to dull hair and freshens already faded or graying eyelashes. Your eyes appear livelier and more expressive - even without make up. The tint is absolutely water and smudge-proof, lasting up to 6 weeks.

The best result is achieved when applying the tint regularly, because with each tinting the colour will penetrate deeply into the eyelashes leaving them more intensely and durably coloured.

Content: 15ml Tube. Sufficient for approximately 30 applications.
