Product Description

Refectocil Lash Tint Brush is a high quality brush that is particularly soft and gentle to the skin. It enables a quick, easy and precise application of tint to lashes and brows - making the treatment even more simple. The flat, straight and particularly elastic bristle of the synthetic taklon enables an exceptionally clean and precise application when tinting eyelashes and eyebrows. Whether its sparse eyebrows being enhanced or a fine line along the lid or if more volume is given to the lashes, with this brush the finest detail work becomes possible.

The synthetic bristle is long lasting, brush and bristle can be cleansed with water after each use.
