Product Description

Claw Tip Tweezers by Ultra Implements are made in Italy of high quality Stainless Steel. These esthetician tweezers are ideal for eyebrows and body tweezing.

For Professional Results: Clean and thoroughly dry the area to be tweezed. Grasp one hair at a time and pull in the direction of the hair growth. The esthetician-style is ideal for general tweezing, especially post-waxing. Hand ground and perfectly aligned tips for increased precision and grip. While tweezing, wipe the inside of the tips often to reduce build-up and eliminate slipping.
