Product Description

Fine Point Tweezers by Ultra Implements are made in Italy of high grade anti-acid, and anti-magnetic Stainless Steel. Don't let the name fool you into thinking that they're just for splinters, though. While their fine point is excellent for removing splinters, they are also great for any precision tweezing work and are particularly handy for removing hair that has been missed when waxing. They are also a favorite for hobbies such as jewelry-making and precision electronics work.

For Professional Results: Isolate the hair to be tweezed and gently pull it in the same direction as the hair growth. Extra-fine tips are ideal for ingrown hair and precision tweezing.
