Product Description

Callus Softener by Gehwol is a liquid product used to soften hard skin, corns, and calluses.

Direction Of Use: Fill the handy 50ml bottle with the liquid product and screw on the dispenser. Activate the pump radily, or insufficient foam will be formed. Apply the foam to the area of skin to be treated and leave it to take effect. Remove the softened skin. Any product remaining on the skin after treatment may be wiped off with a damp cloth. Store the product below 25 degrees Celsius. Avoid contact with eyes and mucous membranes.
