Product Description

Accel Erate Quick Dry Spray allows your polish to be dry to the touch in 60 seconds and completely dry in less than 8 minutes! This product helps reduce the dry time of the already fast drying Morgan Taylor Lacquer. This is a bio organic complex with panthenol which includes vitamin and mineral complexes that is designed to create a protective coating around the skin's keratin protein structure. This product is used at the end of your nail service!

Available in two formulas:

1. Quick Dry Drops: Precision application (Available in 0.3oz and 1oz)
2. Quick Dry Spray: Fast general application (Available in 4oz and 8oz)
