Product Description

Algy Multi-Purpose Collagen Face Mask by Skeyndor contains a soft and velvety tissue with collagen insoluble fibres that form a tri three-dimensional net with very fine pores that allow the impregnation of the DNA solution to promote the transport of collagen and other agents by diffusion through the skin. Highly moisturizing mask, which restores density and supplies water to the skin and restructures it giving the sensation of immediate rejuvenation. Actives circulation and restores tautness and elasticity. Includes 5 treatments with 5x50ml bottles of solution.

Skin Type: All skin types

Active Ingredients: Collagen mask, DNA solution

Application:

- Apply the collagen mask to cleansed skin
- Cut the mask at the nose and neck level (if the client desires, it can also be opened at the eye level)
- Place the mask over the face
- Moisten the mask with the marine DNA solution using a brush or cotton
- Sculpt the mask with some pressure to prevent air bubbles
- Leave for about 30 minutes (it is important to apply the DNA solution to ensure maximum penetration)
- Remove the mask from neck to forehead
- Help the absorption of the remaining solution
- Apply a finishing product
- Exclusive professional use
