Product Description

#13 Foot Soak by Footlogix contains Urea and Aloe Vera. This is a pH balanced gentle cleansing and moisturizing foot soak with anti-microbial properties. The concentrate is blended in a fresh scent formula that rehydrates the skin and softens the calluses. Safe for all skin types, including Diabetics.

Direction Of Use: Add one teaspoon of foot soak into 2 to 3 liters of warm water. Soak feet for about 5 to 10 minutes (less than 5 minutes for Diabetics). Remove feet from the foot bath and gently pat dry while drying thoroughly. This product hydrates the skin and softens calluses, making cuticle work and callus removal easier. Also ideal as an overall body wash.
