Product Description

Power C+ Brightening Antioxidant Program by Skeyndor is a professional treatment designed to illuminate the skin leaving it visibly younger. Intensive light effect treatment and relentless anti-oxidant activity.
The Benefits of vitamin C: It helps to strengthen the skin's protective barrier and reduces trans-epidermal water loss, improving the levels of hydration and skin defence. It stimulates the production of collagen, and therefore increases the density of the dermis. It strengthens the immune system and cell regeneration, and therefore dermal resistance, protecting the skin from environmental aggressions. It provides radiance and better skin clarify by standardizing capillary permeability and improving the overall venous tone. It is one of the most useful molecules for treating sun burns and other inflammatory skin conditions like acne, psoriasis, post-operative scars, or stretch marks. Includes pure c concentrate 15% and pomegranate concentrate 6%.
Skin Type: All skin types, except sensitive skins
Active Ingredients: High absorption vitamin C, Pomegranate HG extract, synergistic combination of acids A (ascorbic), E (ellagic), P (phytic)
Application:
-Cleanse the skin around the eye contour, face, neck, and cleavage using the most suitable product from the Skeyndor make=up remover range, according to skin type
-Tone and standardize the skin pH with the aquatherm thermal water concentrate
-Remove excess dead cells with the essential soft peeling
-Wet your hands and work in circular movements
-Remove with plenty of water
-Apply the pure c+ concentrate 15% using smooth strokes and gentle pressure until the product is completely absorbed
-Use smoothing and pumping movements to help absorption and to remove toxins (do not use with apparatus)
-Continue with the pomegranate concentrate 6%
-Apply 4ml to the face and neck and work it in gently until it is completely absorbed
-Continue with the same draining strokes (do not use any apparatus as this may activate the skin)
-Spread a thick layer of about 20ml of the aloe vera mask using a fine brush or spatula over the whole area to be treated

-Leave on for about 20 minutes
-The mask will gradually be absorbed and it is not necessary to remove it
-While some of the mask may still remain on the skin, tone with plenty of the aquatherm thermal water concetrate
-Clean with a sponge
-To complete the treatment, apply the energizing cream SPF 15 to the face, neck, and cleavage
-Massage gently to help its absorption
-Exclusive professional use
