## Product Description

Hydra-Collagen MicroCurrent Gel is a revitalising, hydrating gel designed to enhance skin elasticity and promote a youthful appearance. Enriched with soluble collagen, this gel helps to restore moisture and firmness, leaving the skin looking plump and rejuvenated.

Glycerin acts as a humectant to attract moisture, while Cocamidopropyl Betaine provides a gentle cleanse, ensuring a smooth texture for easy application. Ideal for use with at-home microcurrent treatments, this gel boosts the skin's radiance and vitality.
