Product Description

Macro-Molecule PHA Toner is a hydrating and exfoliating treatment designed to refine and balance the skin. Powered by Gluconolactone, a gentle polyhydroxy acid (PHA), it helps to exfoliate without irritation, revealing smoother, brighter skin.

Infused with nourishing Aloe Vera Leaf Juice and antioxidant-rich Prickly Pear and Acai, this toner calms and revitalises the skin. With added glycerin and propylene glycol, it provides deep hydration, leaving skin feeling refreshed and balanced, making it ideal for daily use to maintain a healthy, glowing complexion.
